PROFILE

An eager and dedicated undergraduate with a strong passion for technology and a commitment to achieving goals through smart work. I possess solid leadership skills, a collaborative mindset, and a proactive approach, thriving in team environments while maintaining a focus on productivity. With a willingness to take on challenges and learn, I am seeking an internship opportunity as a Software Engineer to apply my skills and explore both current and emerging technologies in the Information Technology field.

EDUCATION

UNIVERSITY OF MORATUWA (2023 - 2027)

- Bachelor of Science Honours in Information Technology (BScHons (IT)) (undergraduate)
- GPA: 3.69/4.00

EMBILIPITIYA PRESIDENT COLLEGE (2013 - 2021)

- G.C.E. A/L (2021) : AAC (Physics A , Chemistry A, Biology C)
- Biology Stream
- G.C.E. O/L (2018) : 9A

PROJECTS

Garage Management System(2024-2025)

Level 2 Software Development Project (Group Project)

developed a comprehensive garage appointment management system designed to handle customer, manager, supervisor, and technician modules for efficient appointment management and seamless workflow. I worked as a full-stack developer and was responsible for the manager-side aspects of the project, including appointment checking, action tracking, appointment tracking, report generation, service management, feedback handling, and history management.

- Technologies: MongoDB, Express.js, React.js, Node.js, MUI components, Vercel and Render(Deployment)
- Role: Full Stack Developer
- Live : [link](#)

UI /UX DESIGNING

- Figma

VERSION CONTROLLING

- Git
- GitHub

SOFT SKILLS

- Problem Solving
- Leadership
- Time Management
- Teamwork
- Effective Communication
- Critical Thinking

INTERESTS

- Reading Technical Blogs
- Chess
- Traveling

LANGUAGES

- English
- Sinhala

CERTIFICATE

- Supervised Machine Learning: Regression and Classification – DeepLearning.AI
- Web Design for Beginners- (Openum)

Automobile Garage Service Management System(2025)

Level 3 EAD Project (Group Project - Leader)

Developed Garage Automobile Service System streamlines garage operations by managing appointments, employees, services, and customer data. It tracks work performance, service duration, and offers a chatbot for real-time appointment scheduling. The system enhances efficiency, boosts productivity, and improves customer satisfaction through automation and seamless management

- Technologies & Tools: SpringBoot, Next.js, Tailwind CSS, Neon (PostgreSQL)
- Role: Team Leader(Full stack Developer)

GoMate Mobile Application (2025)

Developed GoMate, a mobile application for managing public transport schedules and exploring destinations. I contributed to building dynamic lists, implementing favourites functionality, integrating API data, and optimizing performance to enhance the user experience.

- Technologies: React Native, Expo
- Role: Mobile App Developer

Tic Tac Toe Game with Illumination System (2023 - 2024)

Level 1 Hardware Project (Group Project - Leader)

Innovated a Tic Tac Toe game with three modes: Double, Single, and RFID, featuring an illumination system. Focused on designing the Double Player Mode code and hardware, including the input mechanism, move indicators, and seamless hardware-software communication for real-time updates.

- Technologies & Tools: Arduino Mega, ESP32, C language, Proteus
- Role: Team Leader
